HELP INSTALLATION NT-PROJECT SOFTWARE

In the last versions of O.S. WINDOWS have been introduced some security options that may hinder also the installation of our software, anyway you can resolve with these instructions.

The first advice is to install the software from un account of administrator.

After the download of the file INST-XXXXX.zip

- *extract the installation file INST-XXXXX.exe from the zip;*
- *to do double click on file INST-XXXXX.exe;*

At this point if appears this windows or similar

- *in the eventual message "unknown publisher", "potentially harm", etc. click Yes;*

If instead appears this windows

- *not click OK, but click "More info" and will appear this other window;*

- *at this point click "Run anyway" and you can go as seen before;*

- *in the message "unknown publisher", "potentially harm", etc. click "Yes"*
From this point you can continue following the indications of installation procedure.
After the installation to use the software you need register it.

Registration

- *to can use the software XXXXX is necessary to ask the activation code at the supplier;*
- *at the first start of the software to appears this window:*

- *if you don't have already demanded the code, you must fill in all the fields and clicking the button ok (circled in red above);*
- *to appear a message with the number (circled in green below) necessary to obtain the activation code;*

If you haven't the email, you write this number 547139628 to click SI and to send a fax (0039-0532-977713) to NT-Project, else to click NO to send the email (software@ntproject.com)

Sì   No

- *you must send this number to software@ntproject.com so we can send you the activation code;*
- *else if you have a client email configured on your computer you can send the email directly clicking on NO (circled in red above) in the message;*

- *when you have the activation code, you must enter it in the first field (line yellow below) of the window and to click <<OK>> button on the right. At this point the software is correctly registred and running.*
